Projects

- **Payroll Management System:** It was my first academic Laravel project done for any management types of company. Admin can play a vital role e.g. employees salary, bonuses, fines & extra payment etc. Admin can also add rank, designation and rankwise basic salary.
  - **[Link:** https://github.com/abdullah-sust/Payroll-Management-System]
- **E-Notice Board:** This web(JSP) project was for our dept. Because of technical support it is not running now. Admin can upload all kinds of exam news, vacation, scholarship news etc. I did the frontend part.
  - **[Link:** https://github.com/abdullah-sust/E-notice**]**
- **Dx-Ball:** A small game project done with java. I added three level. One must overcome the first level to play in the second level.
  - **[Link:** https://github.com/abdullah-sust/Dx-Ball**]**
- **Online Exam Taker:** It was my first academic android project basically for a class teacher. He/she can take exam from students and deliver the results to students immediately.
  - **[Link:** https://github.com/abdullah-sust/OnlineExamTaker**]**
